

**NOT FOR NEW DESIGN**

- High load voltage - up to 480VAC
- 4 - 32VDC or 90 - 250VAC Control voltage
- Single phase, zero crossover switching
- LED Control input indicator
- Integrated heatsink
- DIN Rail or chassis mounting

## Output (Load)

Load type	SPST-NO (1 N/O) Resistive
Load current	60A, 80A
Load switching voltage	AC $V_{rms}$ 40 ~ 480V
Maximum peak voltage	AC $V_{pt}$ 900V
Minimum load current	0.1A
Inrush current (max.)	10ms 60A: 650A / 80A: 900A
$I^2t$	A <sup>2</sup> s 60A: 2100 / 80A: 4050
Switch type	Zero crossover

## Input (control)

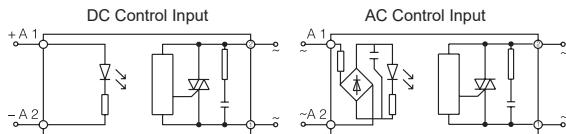

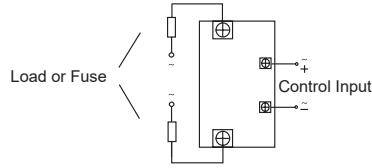

Control voltage	VDC DC: 4 ~ 32VDC / AC: 90 ~ 250VAC
Control current	mA <20
Turn-on voltage (min.)	V <sub>min</sub> DC: 3.5VDC / AC: 80VAC
Turn-on voltage (max.)	V <sub>max</sub> DC: 35VDC / AC: 280VAC
Turn-off voltage	V DC: 2VDC / AC: 40VAC

## Environmental

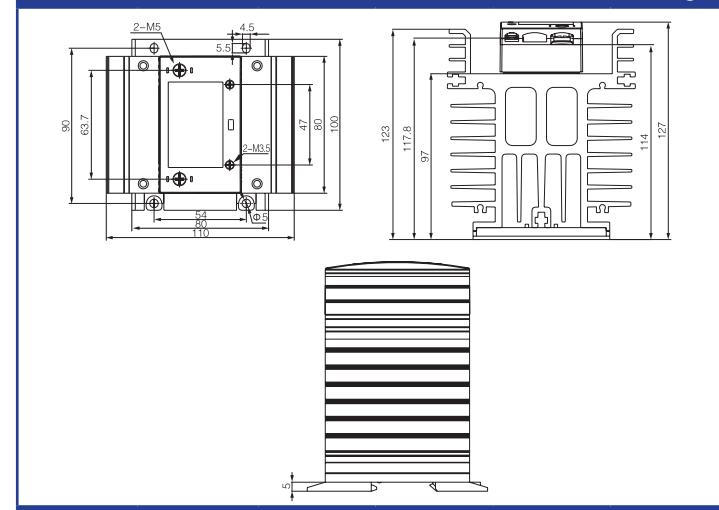

Dimensions	L x W x H	100 x 110 x 127mm
Weight	approx.	940g
Note:		
• All SSR's should be protected by fast acting "semiconductor" fuses.		
• Circuit breakers and normal fuses are not quick enough to protect the SSR in the event of a current surge or spike"		
• It is recommended that load power is kept to no more than 70% of the SSR's rating to avoid unexpected issues in the event of variations in the load and ambient temperature" These SSR's are designed to be used with a suitable heat sink.		
• Transfer Pads and Heatsinks for Durakool SSR relays can be found in Durakool's Solid State Relay (SSR) catalogue.
