Accessory options

Blank: No option

S: Auxiliary switch

Fitted with varistor for coil surge suppression as standard

Mounting & terminations

Blank: No bracket

NB: Mounting orientation:

The DSC150 may be mounted horizontally, but if mounted vertically, the coil should be positioned downwards.

Magnetic latching types:

For latching types, ensure square wave pulse length between 500ms and 1s to allow contacts to settle and magnetic circuit to be fully established. Operating frequency should be no more than 6 ops/min. Continuous energisation is not allowed.
